

Dev Activity Report on Bitcoin, Ethereum and Cosmos

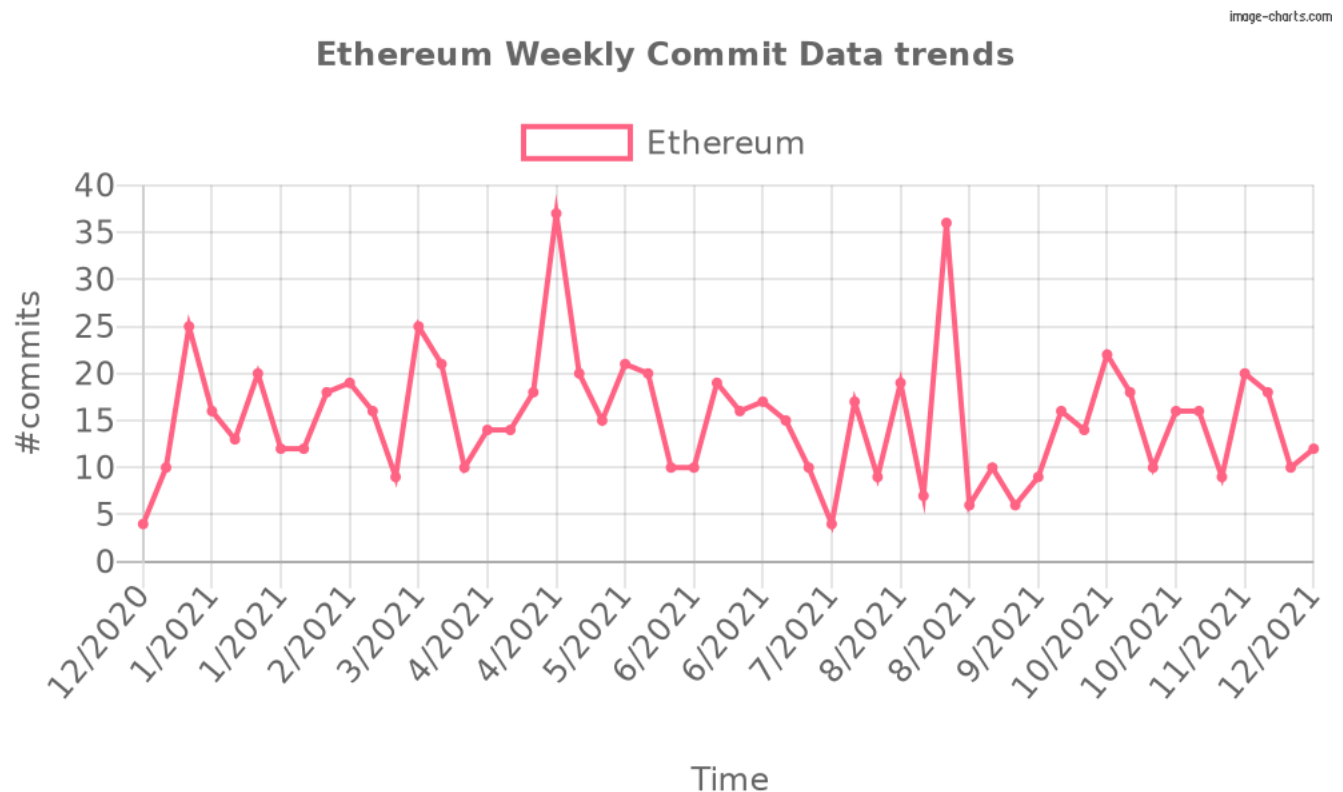

Bitcoin Weekly Commit trends on Github

Key Points from Bitcoin Commit trends for last 12 months

- The maximum weekly commits of 106 commits per week were recorded in the week of Sunday, May 23, 2021
- The week of Sunday, October 31, 2021 has the minimum weekly commits of 24 commits per week
- The Average weekly count for the last year was 58.7

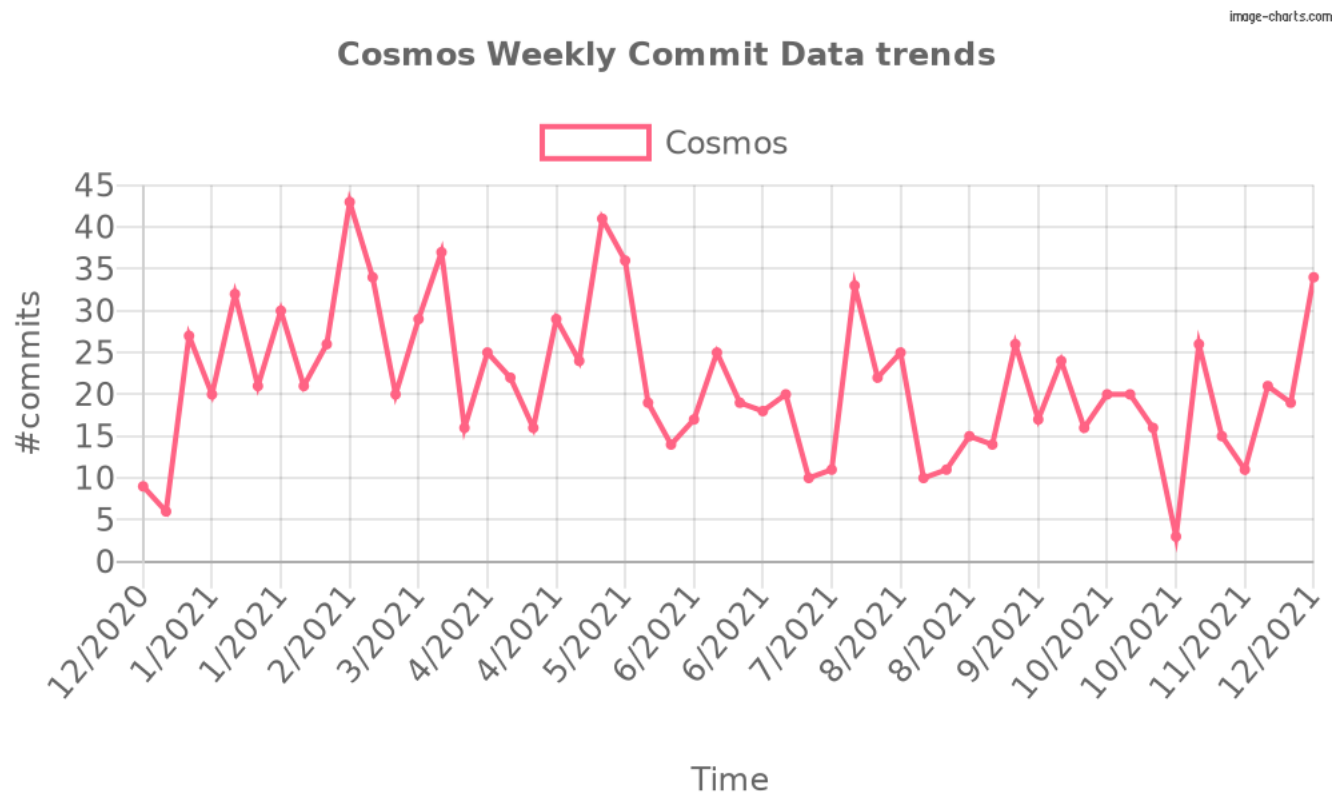

Ethereum Weekly Commit trends on Github

Key Points from Ethereum Commit trends for last 12 months

- The maximum weekly commits of 37 commits per week were recorded in the week of Sunday, April 25, 2021
- The week of Sunday, December 20, 2020 has the minimum weekly commits of 4 commits per week
- The Average weekly count for the last year was 15.3

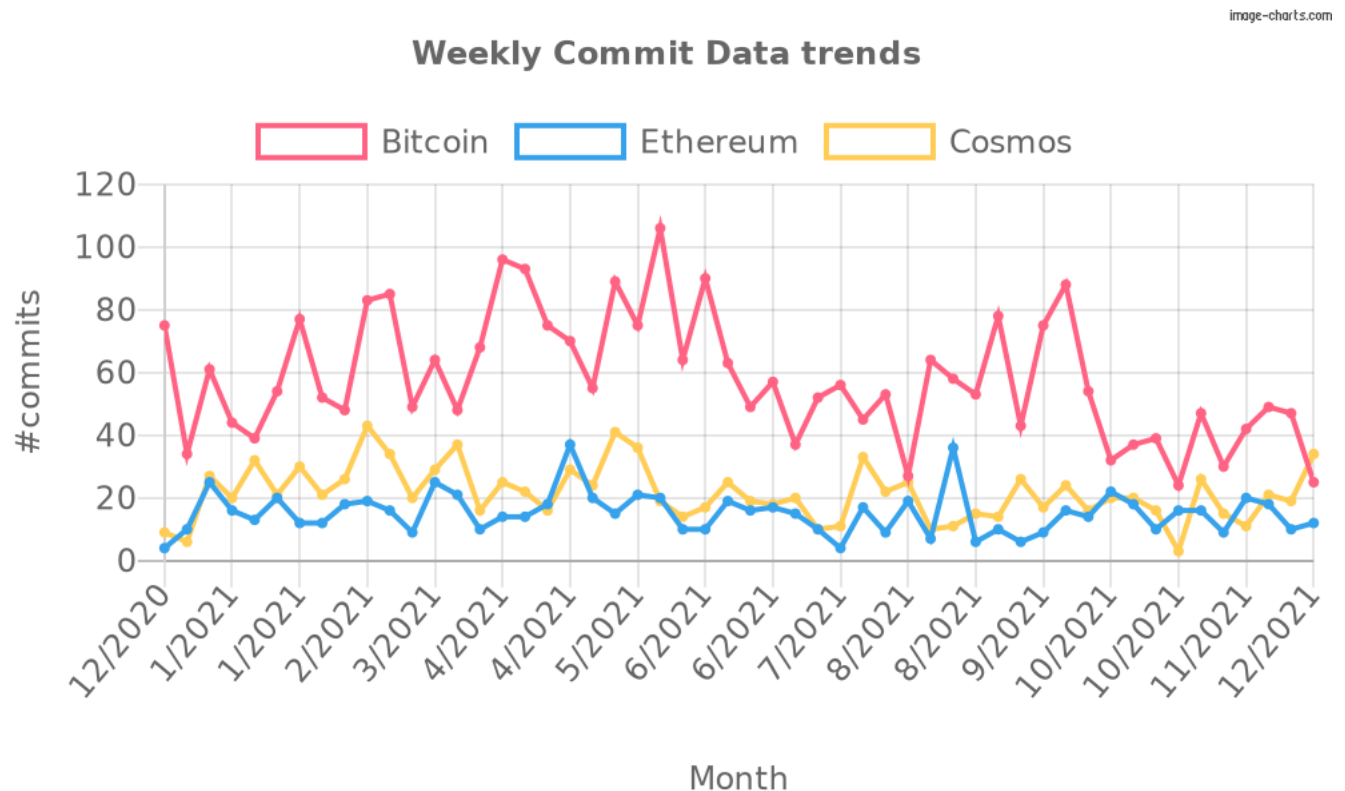

Cosmos Weekly Commit trends on Github

Key Points from Cosmos Commit trends for last 12 months

- The maximum weekly commits of 43 commits per week were recorded in the week of Sunday, February 21, 2021
- The week of Sunday, October 31, 2021 has the minimum weekly commits of 3 commits per week
- The Average weekly count for the last year was 21.2

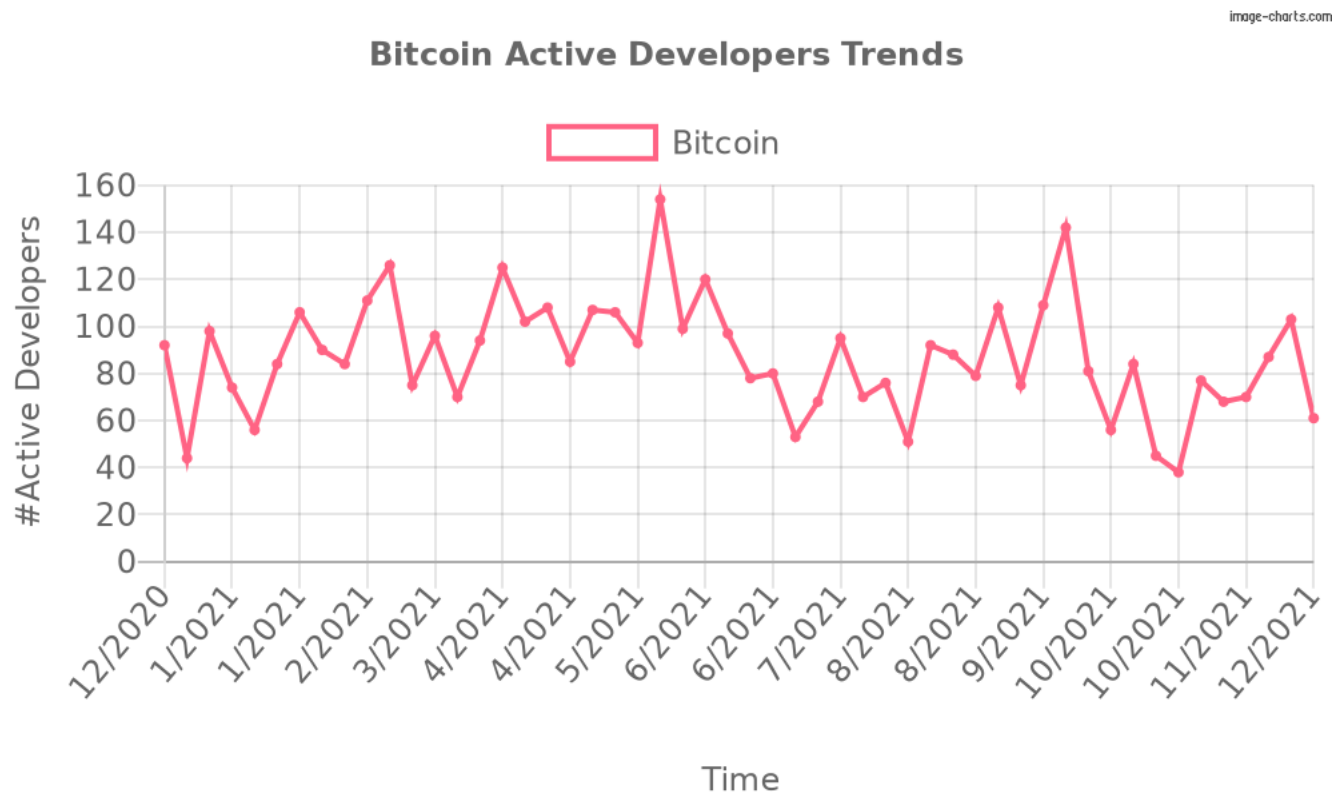

Comparison of Commit activity on all of the three repositories

Key Points from the comparison of weekly commit counts

- Among the three technologies, Bitcoin had the highest average weekly commit count of 58.7
- Ethereum had the minimum average weekly commit count of 15.3

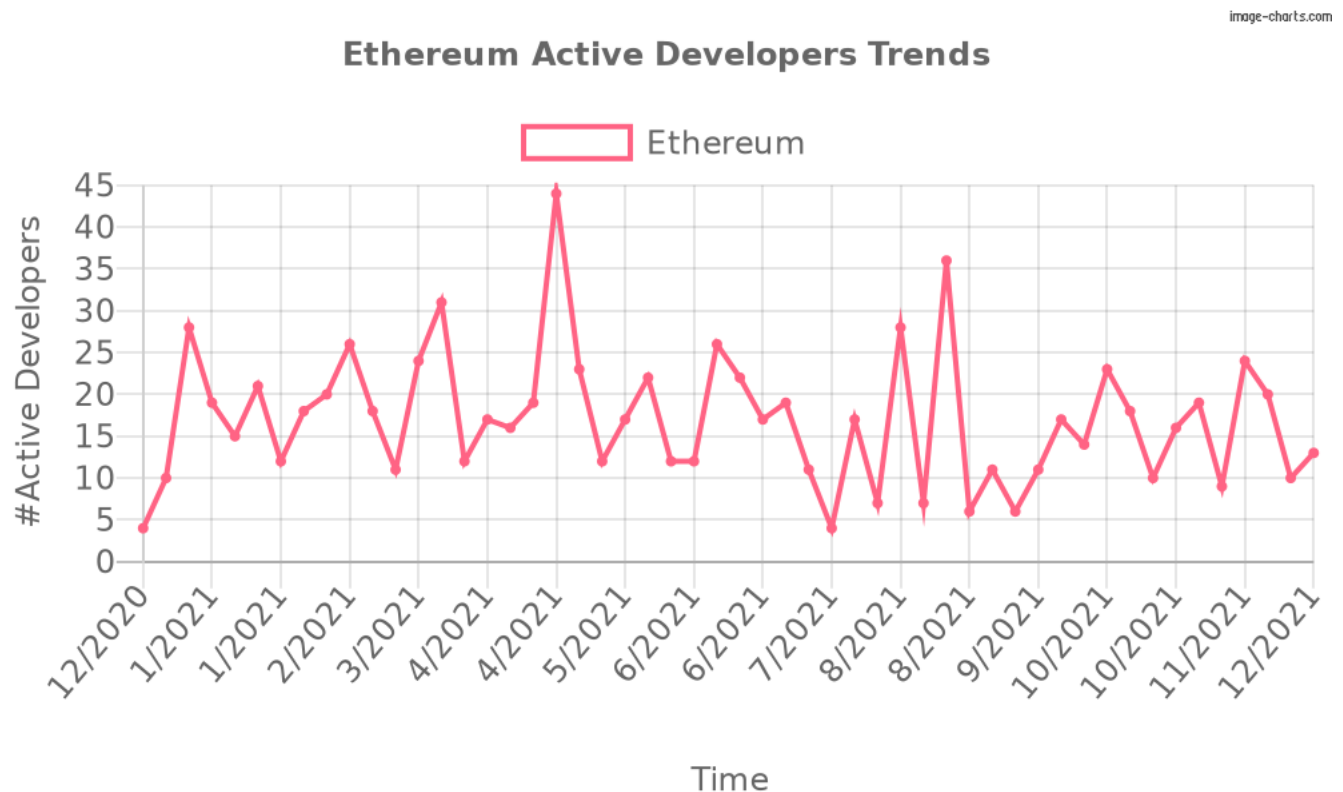

Bitcoin Weekly Active Developers

Key Points from Bitcoin Active Developers count for the last 12 months

- 154 developers were active in the week of Sunday, May 23, 2021 which is the maximum of all weeks
- 38 developers were active in the week of Sunday, October 31, 2021 which is the least among all weeks
- The Average weekly active developers for the last year was 87.6

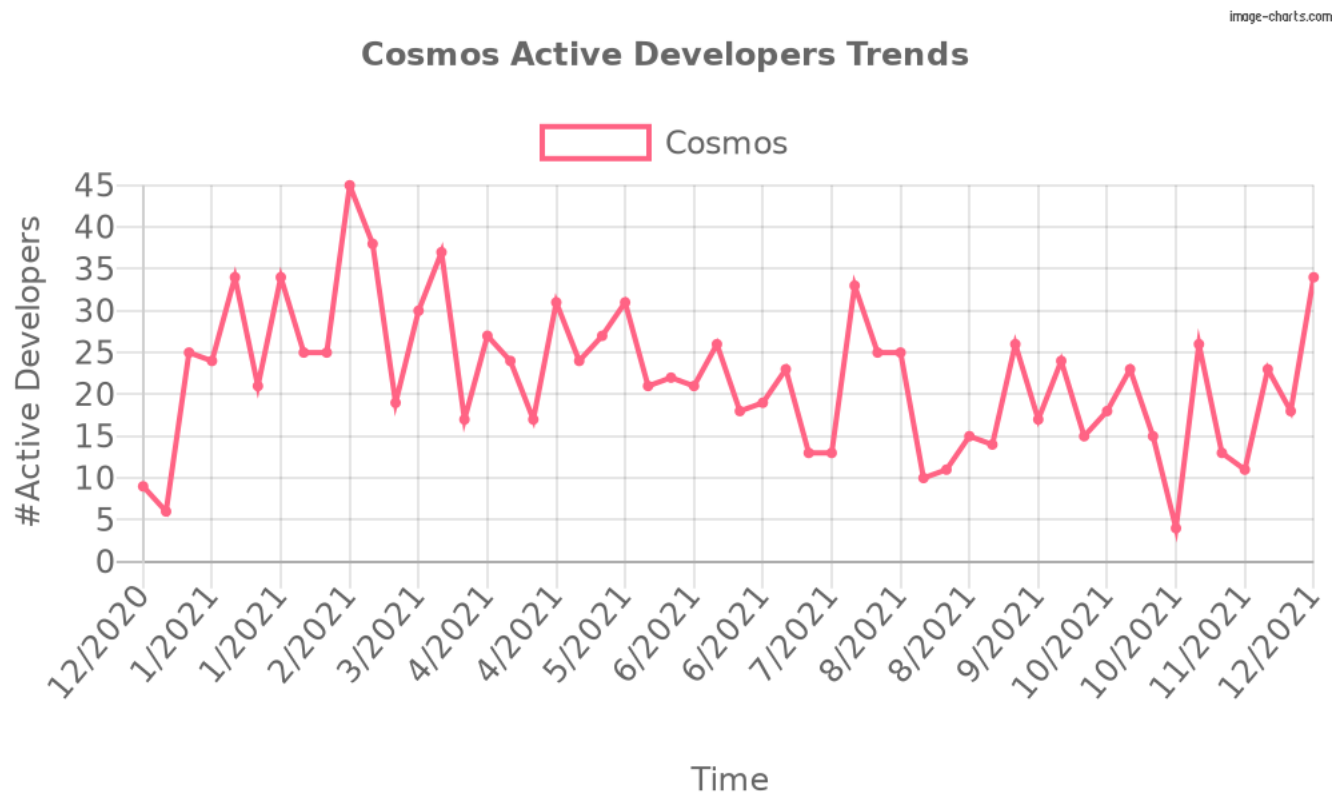

Ethereum Weekly Active Developers

Key Points from Bitcoin Active Developers count for the last 12 months

- 44 developers were active in the week of Sunday, April 25, 2021 which is the maximum of all weeks
- 4 developers were active in the week of Sunday, December 20, 2020 which is the least among all weeks
- The Average weekly active developers for the last year was 17.1

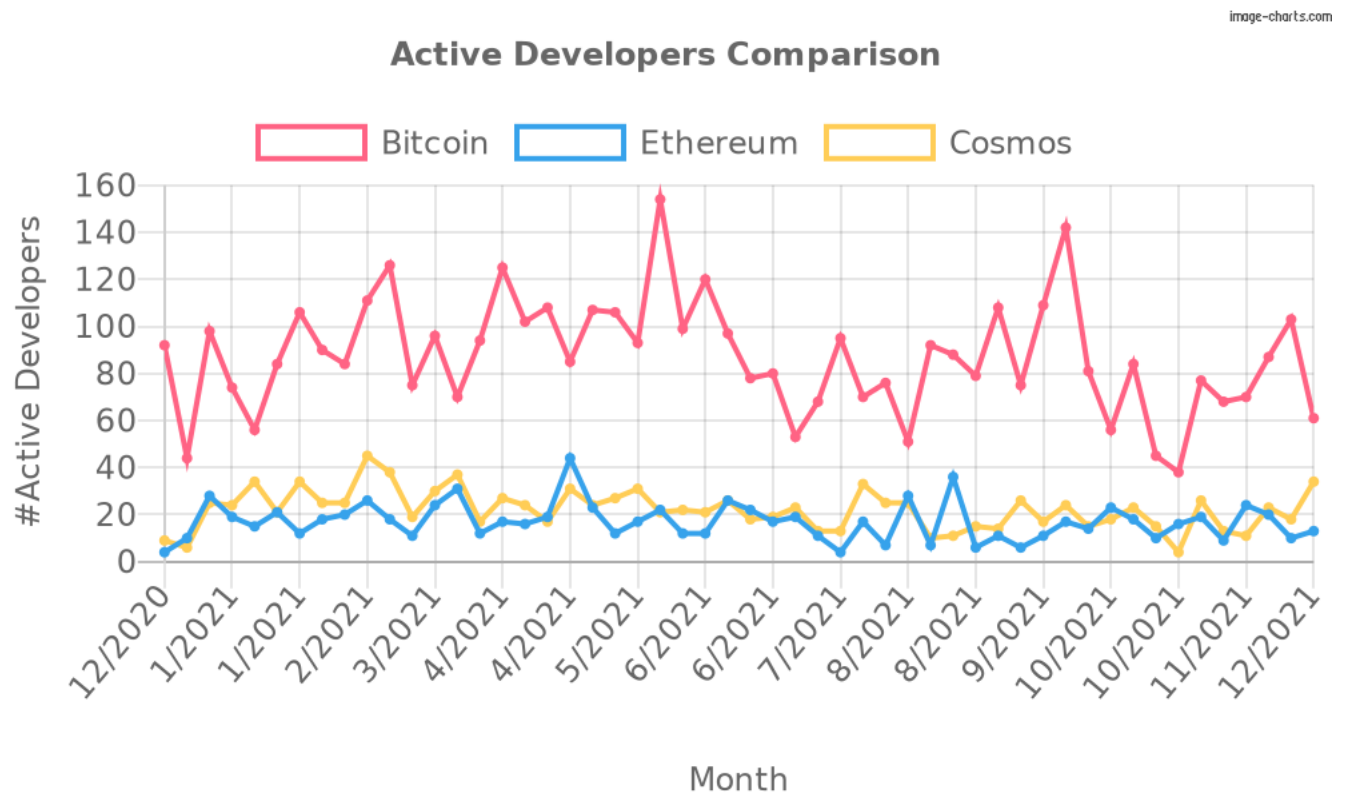

Cosmos Weekly Active Developers

Key Points from Bitcoin Active Developers count for the last 12 months

- 45 developers were active in the week of Sunday, February 21, 2021 which is the maximum of all weeks
- 4 developers were active in the week of Sunday, October 31, 2021 which is the least among all weeks
- The Average weekly active developers for the last year was 21.8

Comparison of Active Developers count

Key Points from comparison of active developers count

- Among the three technologies, Bitcoin had the highest average active developer count of 87.6
- Ethereum had the least average active developer count of 17.1
